Package 'tesselle'

November 30, 2023

Title Easily Install and Load 'tesselle' Packages

Version 1.4.0

Maintainer Nicolas Frerebeau <nicolas.frerebeau@u-bordeaux-montaigne.fr>

Description Easy install and load key packages from the 'tesselle' suite
in a single step. The 'tesselle' suite is a collection of packages for
research and teaching in archaeology. These packages focus on
quantitative analysis methods developed for archaeology. The
'tesselle' packages are designed to work seamlessly together and to
complement general-purpose and other specialized statistical packages.
These packages can be used to explore and analyze common data types in
archaeology: count data, compositional data and chronological data.
